

APPENDIX A *REFERENCE MAPS*

A map showing the city's subarea planning boundaries is provided at the beginning of the chapter entitled "Key Findings by Subarea." This appendix provides a set of additional reference maps for Bellevue (starting on the next page). The reader may find it helpful to consult these maps while viewing the thematic census data maps in the body of the report.

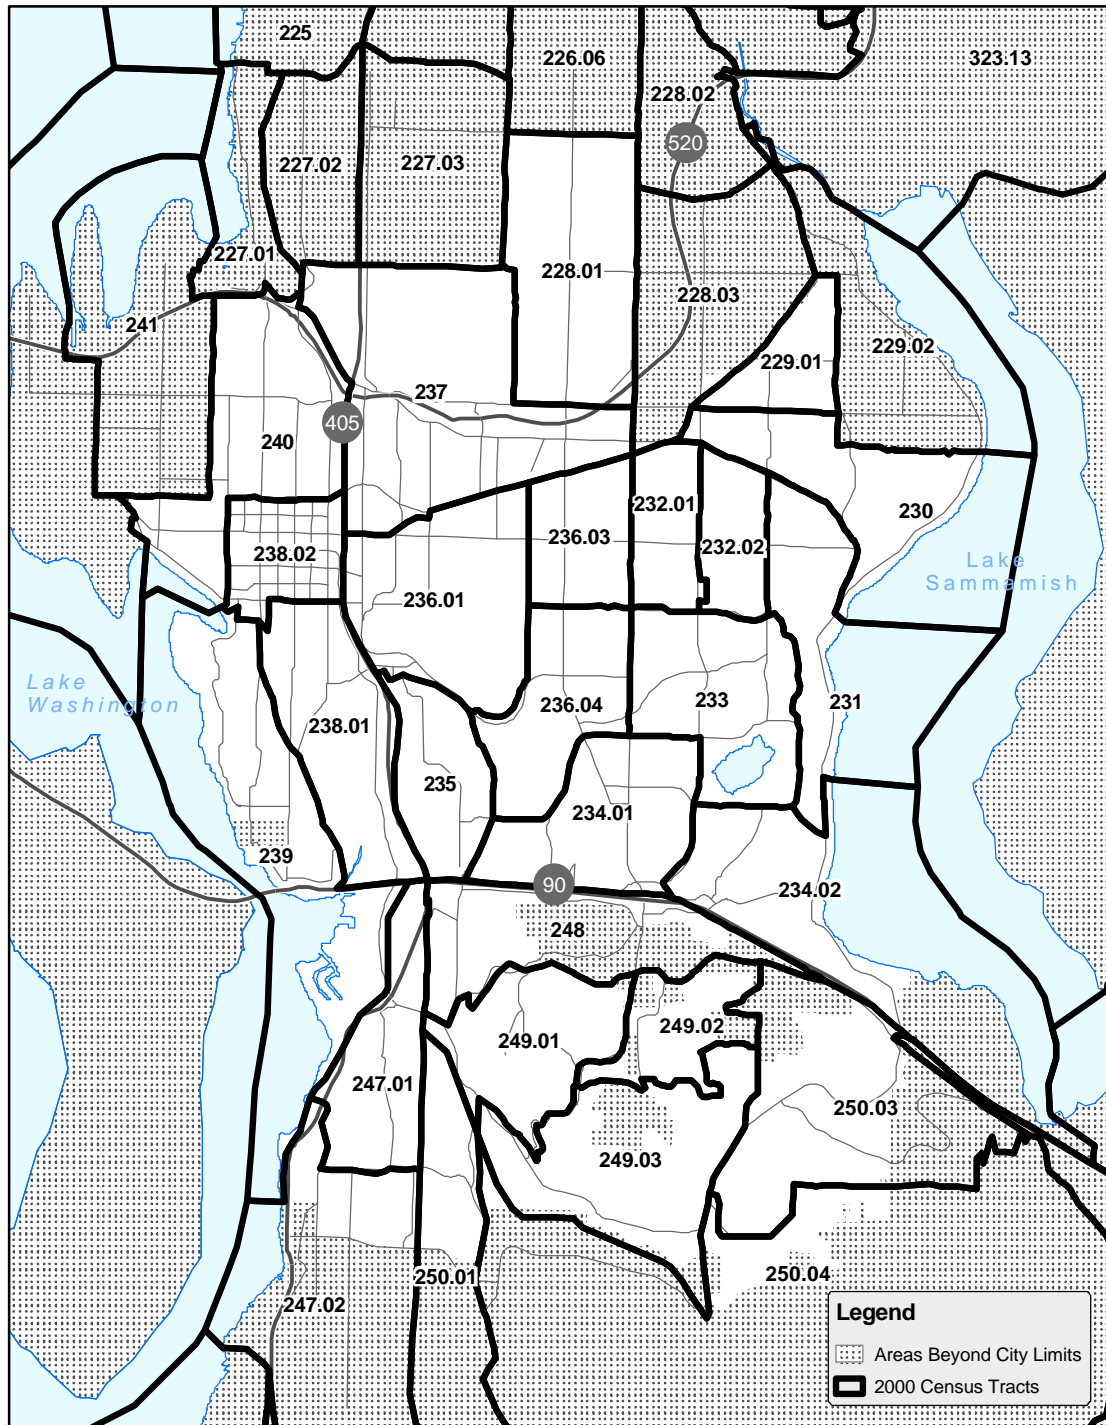

- Pair of maps:
 - ♦ 1990 census tracts
 - ♦ 2000 census tracts
- Annexations by decade
- Zoning
- Neighborhood areas defined for the City's Neighborhood Enhancement Program (which, as noted in the Introduction, are somewhat different than the city's subarea planning boundaries)
- Neighborhood and community associations

Appendix B, which follows, contains a table showing 1990 and 2000 population figures for each 1990 census tract wholly or partly in Bellevue.

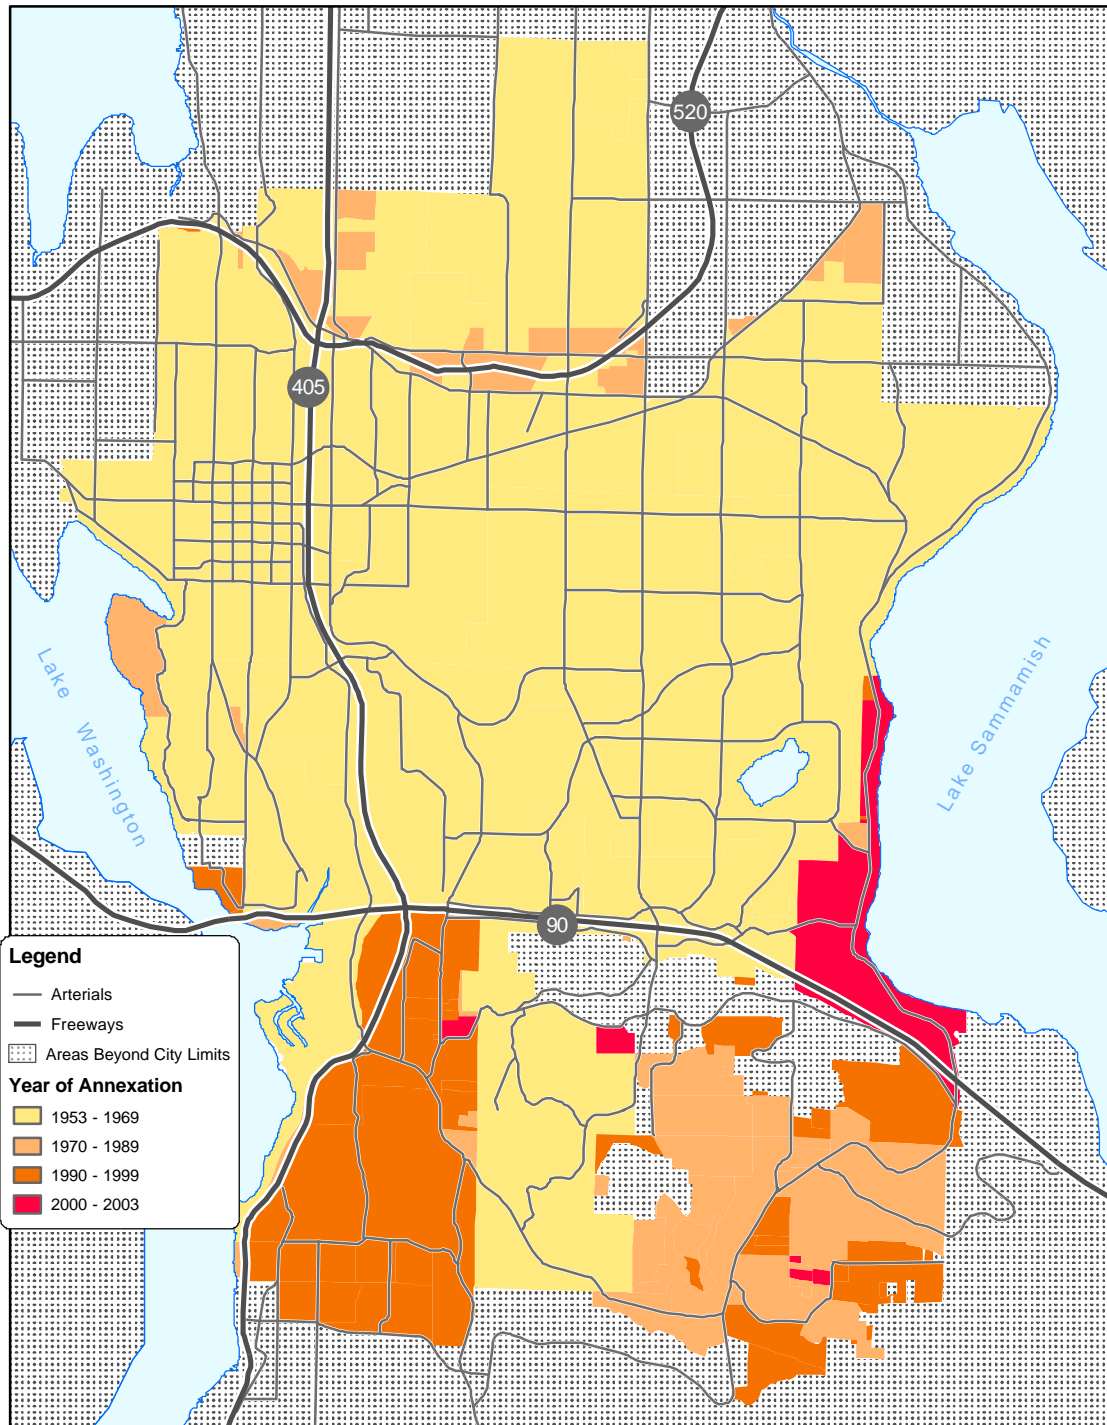

1990 Census Tracts in Bellevue

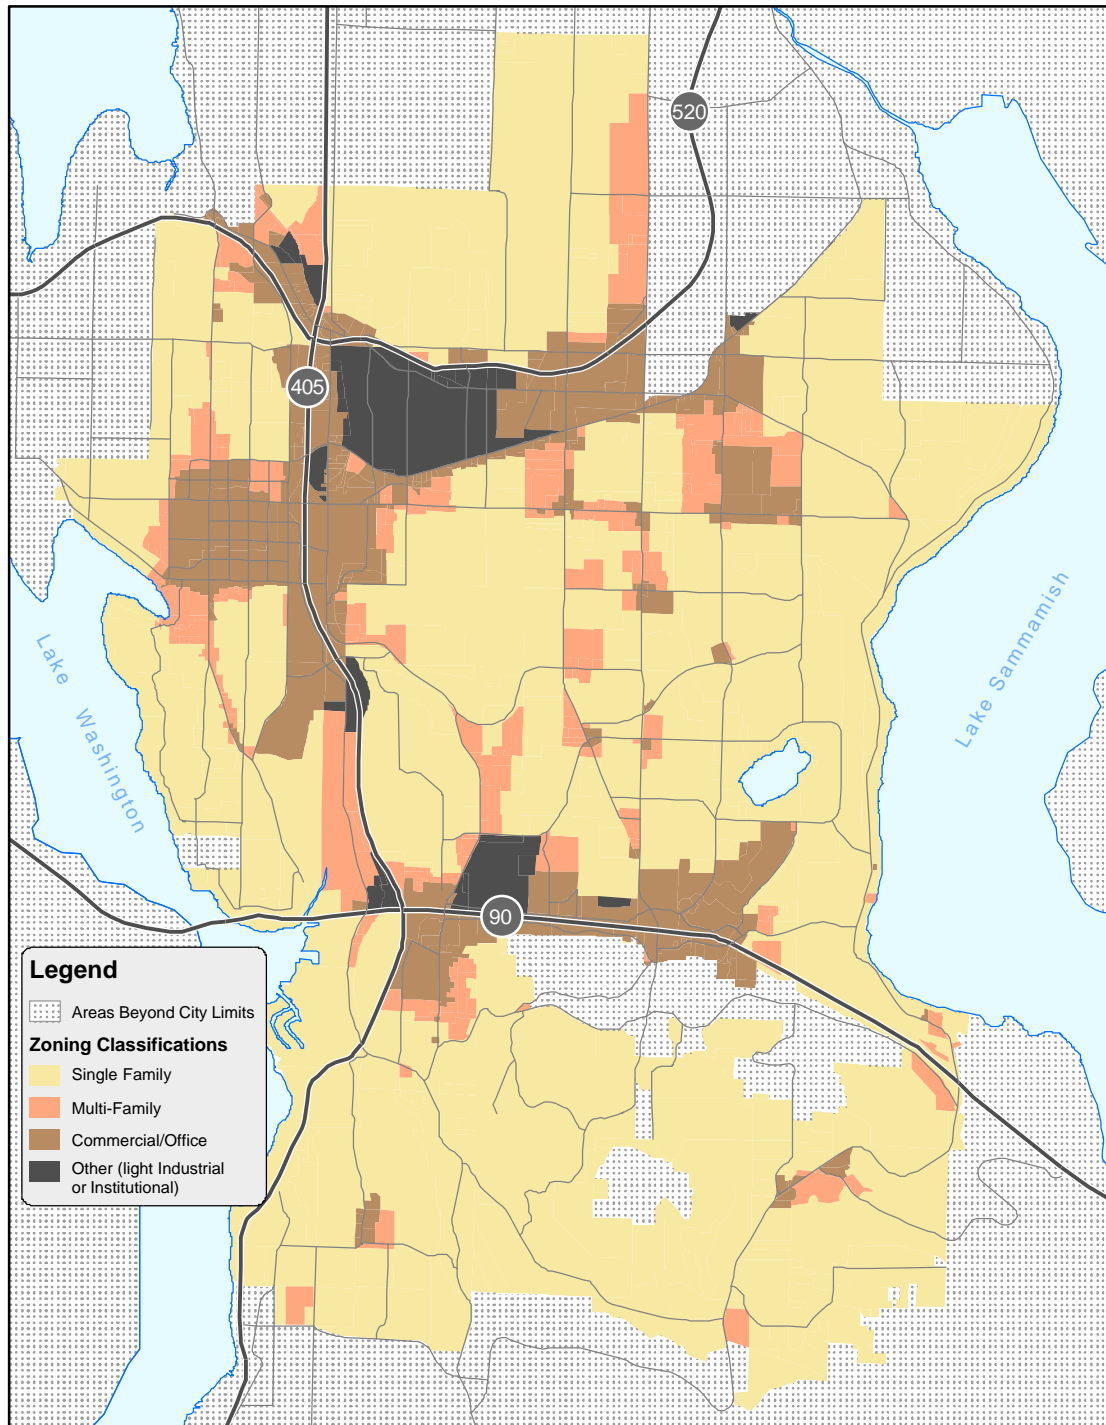

2000 Census Tracts in Bellevue

Bellevue Annexations by Decade

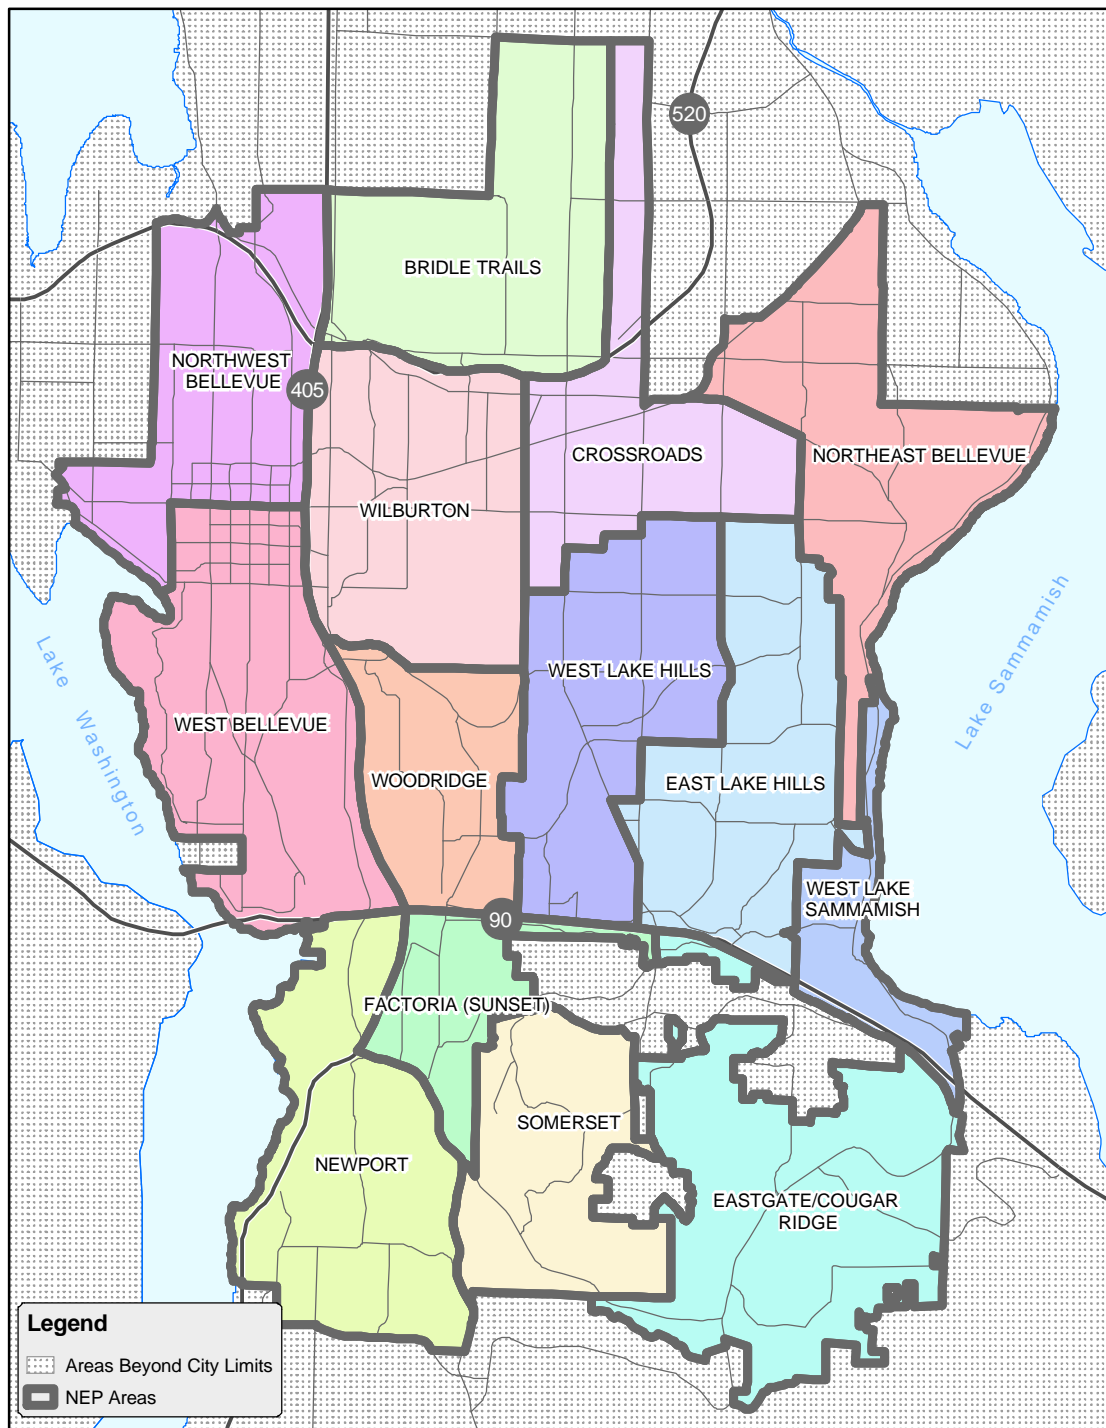

Bellevue Zoning

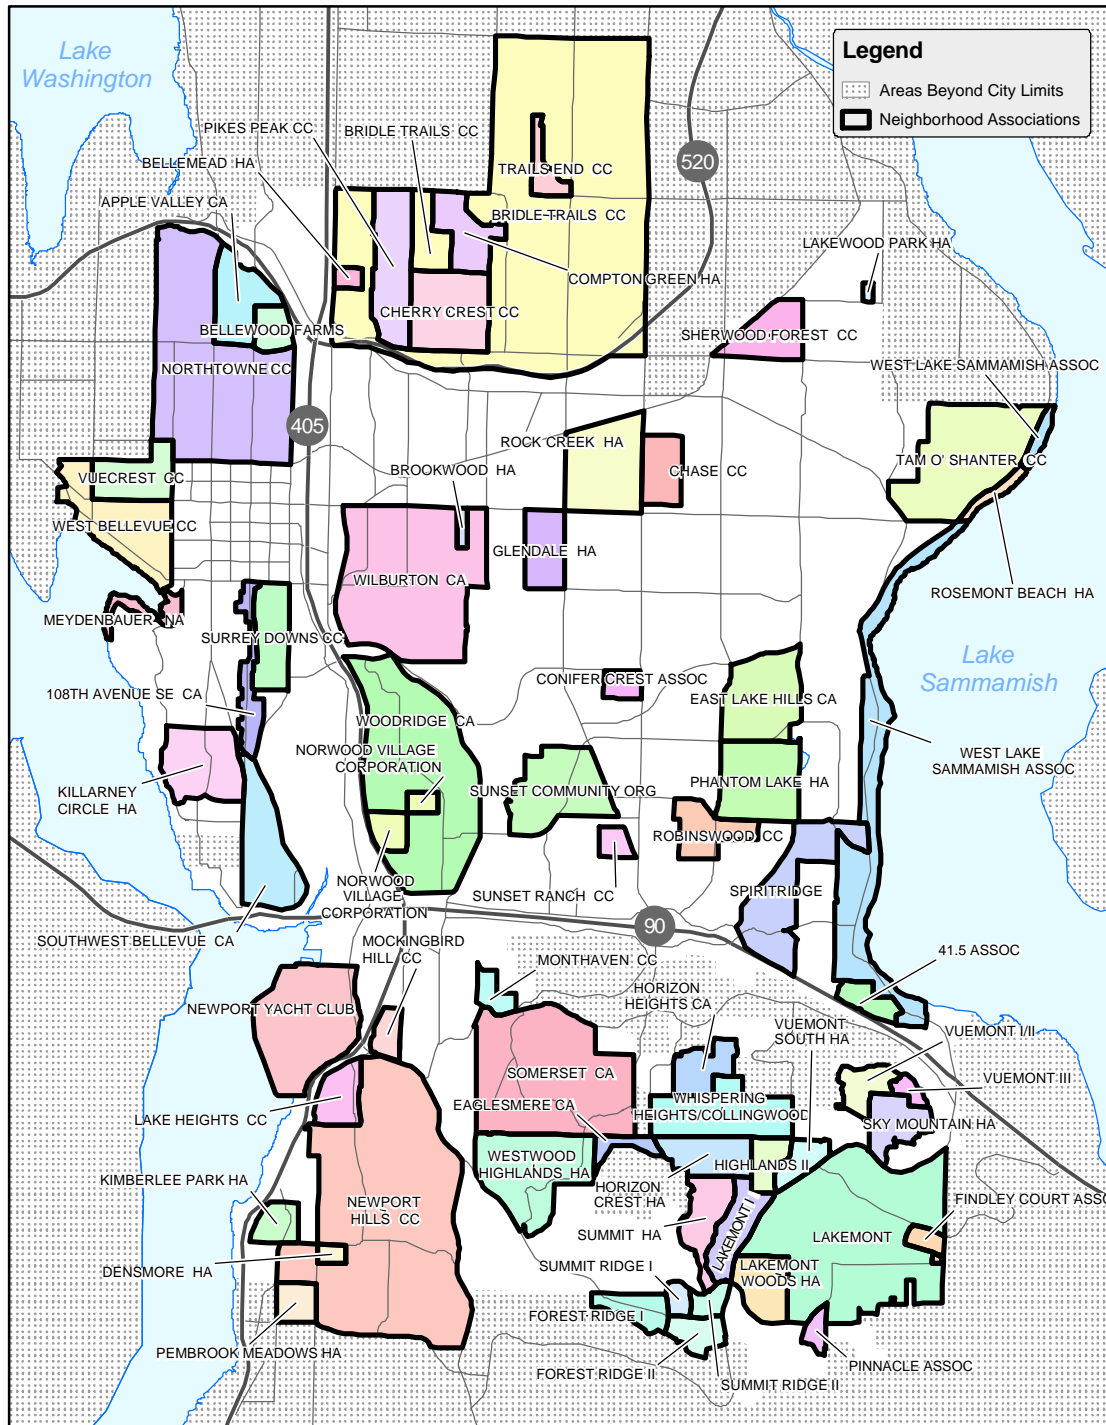

Neighborhood Areas

Bellevue's Neighborhood Enhancement Program

*Minor changes are being made to the NEP boundaries in preparation for the 2004-2006 NEP cycle. The only areas affected will be those in East and Northeast Bellevue (i.e., Crossroads, Northeast Bellevue, Lake Hills, and West Lake Sammamish). New maps will be available from the City in early 2004.

Neighborhood and Community Associations in Bellevue
